## Introduction

This document can be used to configure McAfee firewall software to allow the GTS Pro to run on your computer. Use this document if you get the following error message: “The G.T.S. Application was unable to establish a Secure Connection to the Fx Solutions Data Center.

## Client Procedures

1. Click on the Start button and navigate through Programs and locate the McAfee folder.
2. Launch either the “Personal Firewall” or if that is not listed, launch the “Security Center”
3. Click on Internet Applications.
4. Find “fxsgtst.exe” and “fxsgtstum.exe”
5. Click once to highlight and then select the button “Allow Full Access” for both file names.
6. Restart your computer after you complete this procedure.
7. Log on to the Fx Solutions GTS Pro.
